SUMMARY

Driven by a passion for coding, I am eager to enhance my skills and expand my programming abilities. With a strong foundation in full stack development, including expertise in Java, React JS, and modern frontend and backend technologies, I thrive on challenges that allow me to broaden my technical landscape. Currently pursuing a Bachelor of Computer Applications, I am committed to continuous learning and development in this ever-evolving field.

EDUCATION

+2 in Computer Science

Samriddhi School

📅 2018 - 2020

Bachelor of Computer Applications (BCA)

Kathmandu Business Campus

📅 2020 - Running

PROJECTS

Music On

A web application for music enthusiasts with features for robust database management and dynamic user interface.

- Developed using React and Tailwind for frontend.
- Implemented Spring Boot for the backend.
- Utilized PostgreSQL as the database.
- Link : [Music On \(song-on.vercel.app\)](https://song-on.vercel.app)

Blog Tale

Key role in enhancing the project's user interface using frontend technologies.

- Crafted visually appealing and user-friendly interfaces with HTML and CSS.
- Added interactivity and dynamic elements with JavaScript.
- Leveraged React.js for reusable component development.
- Link : [Home Page \(blogtale.vercel.app\)](https://blogtale.vercel.app)

Work Progress Tracker

A web-based tool for monitoring and managing project tasks.

- Utilized HTML for web page layout and content structuring.
- Applied CSS for styling the application's visual appearance.
- Used JavaScript for adding interactivity and dynamic behavior.
- Employed AJAX for real-time updates without full page reloads.
- Implemented PHP for server-side scripting and dynamic content generation.
- Chose MySQL for managing relational databases.

STRENGTH/SKILLS

Modern Frontend Technologies: React JS, Tailwind, HTML, CSS, JavaScript

Rest API Development

Java, including Spring and Spring Boot

UI/UX Expertise

STRENGTH/SKILLS

Database Management with MySQL and PostgreSQL

Full Stack Development
